Al Amin Hossain

Front-End Developer

📍 Rayerbag, Dhaka, Bangladesh   📞 +8801922866947   ✉ alamindev.io@gmail.com

in /alaminhossainpro   **🐙 /alamindevms**

As an enthusiastic web developer, I am dedicated to leveraging my expertise in web development and maintenance to address the unique requirements of clients. I am passionate about collaborating with a dynamic team of driven individuals who share the common goal of propelling the company forward and achieving its objectives.

Experience

Sysable Technology — Front-End Developer
📅 2022 - present

`Vuejs` `Tailwind CSS` `Bootstrap`

Sysable Technology is a leading software development company specializing in ERP, E-Commerce, and Android app development, with expertise in web solutions.

- Hospital Management Systems, Enterprise Resource Planning and E-commerce platforms.
- Designing and creating Vue components for the application.

Mistri Solutions — Front-End Developer
📅 Jan 2022 - Mar 2022

`Vuejs` `Vuetify` `Inertia` `Tailwind CSS` `Bootstrap`

As a software development company Mistrisolutions mainly works with web-based applications as well as android app. I was working as a front-end web developer.

- Worked as a part of 5 member team to release an E-Commerce (Vuetify) project and successfully released the project on time.
- Implementing design on mobile websites and following SEO best practices.

Stargate Communications — Executive Support Eng.
📅 Jul 2016 - Jun 2021

`Networking`

A nation wide Internet Service Provider (**ISP**) company specializing in Networking.

- As an Executive Support Engineer, I was responsible for managing a team of six cable technicians. In addition to overseeing the team, I was also responsible for configuring the client-side router.

Featured Project

RERP

`Vuejs` `Pinia` `Tailwind CSS`

ERP system streamlines data management for production, finance, HR, and more using Laravel, Vue, Tailwindcss, ensuring role-based access and custom reporting. 🔗 https://laraerp.sysable.tech/

CareGuru

`Vuejs` `Pinia` `Tailwind CSS`

CareGuru is a comprehensive hospital management system that offers a complete solution for online appointment scheduling, sample collection, and online delivery of medical reports. It encompasses three key panels: a Doctor panel, a Patient panel, and an Admin panel, providing full reporting capabilities for efficient hospital operations. 🔗 https://careguru.aaraa.com.bd/
